

CLOCKING SOLUTIONS

REMOTE CLOCKING

REAL-TIME CLOCKING IN THE FIELD

Our remote clocking solution combines a robust IP68 clocking device, communicating via Mobile Data, Wi-Fi or USB cable, together with a user-friendly App and software, directly integrating with our Payroll Software.

- Real-time Information
- Automatic syncing of data
- User-friendly
- Fully integrated with Payroll software
- Time & Attendance
- Piecework
- Job Costing
- Centralized Management of Employees and Devices
- Live Attendance Monitoring
- Automatic Aggregation and Export of Clocking Records
- Low maintenance
- Managed SIM Cards and Data

S922 PORTABLE FINGERPRINT TIME & ATTENDANCE TERMINAL

REAL-TIME CLOCKING IN THE FIELD

This portable fingerprint reader uses advanced biometric tech to record Time & Attendance in the field. It features a 7600 mAh backup battery, stores up to 200 000 records, and supports up to 10 000 employees. Robust and water-resistant, it's ideal for outdoor use.

Data can be downloaded via Wi-Fi, Ethernet, or USB. Mobile connectors allow charging in vehicles.

TFT600 FINGERPRINT TIME & ATTENDANCE TERMINAL

THE CLIENT FAVOURITE MOUNTED UNIT

The TFT600 is a reliable, user-friendly fingerprint reader and top-rated access control device. It supports up to 10,000 fingerprints and stores 200,000 clocking records.

Buddy clocking is fully eliminated. Data can be downloaded via USB, Wi-Fi, or ethernet. It also integrates with access control systems like magnetic locks and turnstiles.

FA1000 FACIAL CLOCKING SYSTEM

BIOMETRIC FACIAL RECOGNITION

Facial recognition scanner with up to 2m recognition distance. Features anti-spoofing, wide-angle detection, and 1-second recognition. Uses deep learning and visible light technology for fast and accurate recognition, even in dynamic environments. Improved pose angle tolerance and spoofing protection.

FA4000 FACIAL CLOCKING SYSTEM

BIOMETRIC FACIAL RECOGNITION

Facial Recognition Scanner with 1.7m range. Anti-spoofing, wide-angle detection, 1-second recognition, and advanced face recognition algorithms.

Uses visible light and deep learning for fast, accurate recognition from a distance. Improved speed, accuracy, pose angle tolerance, and spoofing protection compared to older models.

CLOUD BASED SOFTWARE

Our cloud-based software lets you sync attendance data from selected biometric terminals to the Remote Clocking Cloud - anytime, anywhere. With Remote Clocking Biometrics Integration, compatible devices work seamlessly with our system. All data is submitted to the cloud and visible on Remote Clocking devices, as long as the PC is connected to the internet.

BATON ELECTRONIC COIN SCANNER

The Electronic Coin Scanner is a durable, portable clocking system built for tough field conditions. Ideal for tracking piecework and time & attendance in agriculture, and also widely used in industries like security and construction.

STORE UP TO 15 000 CLOCK RECORDS, BEFORE DOWNLOADING

The Electronic Coin Scanner stays in the field, with a battery that lasts up to two seasons. Dallas coins need no maintenance, and the system integrates seamlessly with payroll.

PAYROLL MANAGEMENT SOFTWARE

As our flagship product, this user-friendly and fully customizable system meets all Labour and SARS requirements. It features flexible reporting, easy data input, Excel imports, and time-saving global change tools. Reports export to Excel, Word, PDF, or printer.

COST-EFFECTIVE, USER-FRIENDLY & PRACTICAL

The Package includes the following Modules:

- Payroll
- Time Systems
- Job Costing
- Piecework

Our Payroll Management Software offers powerful, user-friendly tools for managing employee data, processing payments, and handling tax compliance with ease. Fully customizable, it includes integrated piecework, leave tracking, reporting, and seamless bank and SARS integration. Fast, accurate, and built to meet all your payroll needs, no manual work required.

TIME & ATTENDANCE MANAGEMENT SOFTWARE

Our Time & Attendance Software is fully integrated with our Payroll module, enabling seamless, accurate data transfer from a wide range of supported clocking devices—including Electronic Coin Scanners, Turnstiles, Remote Clocking Units, Fingerprint Readers, Facial Recognition Devices, and Access Control Systems.

CLOUD-BASED CONVENIENCE

With Remote Clocking Cloud integration, selected biometric units can upload data remotely in real-time, as long as an internet connection is available, no manual downloads needed.

Time & Attendance and Piecework data flow directly from hardware into our system, reducing manual entry and human error. Graphical displays make it easy to review, validate, and correct data at a glance. User-defined rules further streamline processes by applying standard times, breaks, and grace periods automatically.

FARM MANAGEMENT SOFTWARE

Our Farm Management Software is a cost-effective, user-friendly solution designed for full traceability and control of all farming activities. With a centralized main module and fully integrated components, it simplifies setup and access to key areas like blocks, tractors, and spray carts, giving you total farm oversight in one system.

RECORD KEEPING LIKE NEVER BEFORE

The Package includes the following Modules:

- Spray
- Fertilizer
- Costing
- Income
- IPW
- Pest Monitoring
- Fuel Management
- Diary

Our Farm Management Software offers fully integrated modules for spraying, fertilizing, costing, income tracking, and more. Built to GLOBALG.A.P. standards. Easily manage chemicals, fertilizers, block-level costs, and profitability with real-time data. Additional modules cover assets, pest monitoring, IPW compliance, and a built-in farm diary, giving you total control of your farming operation in one smart system.
